

International Drug Testing Services

Providing global access and expertise for international drug testing programs

Global Access

We offer the worldwide laboratory solutions you need to help ensure the success of your drug testing program. Our facilities in the United States, Mexico, and our laboratory partners in Australia provide reliable results with fast turnaround times.

Proven Expertise

Our laboratory and scientific capabilities, along with our extensive program management experience and global collection network allow us to tailor an international drug testing program to fit your specific needs. By partnering with Quest Diagnostics, you receive comprehensive guidance from an industry leader with more than 25 years of workplace drug testing experience.

Ease of Business

All laboratory data is centralized and available for review using our secure, online portal. We offer a wide range of customized reporting options including, but not limited to positivity rates, turnaround times, and testing spend. Our centralized billing system delivers one invoice for all services regardless of the country or laboratory performing the testing.

Quest Diagnostics Advantages

Program management focused on leveraging the most frequent hurdles when drug testing abroad:

- Cultural awareness
- Business etiquette
- Import/export customs
- Currency exchange

International Drug Testing Services

Urine Testing

Urine drug testing is an accurate and reliable method for detecting recent drug use - typically in the previous one to three days.

Oral Fluid Testing

Oral fluid testing offers lab-based drug test results from an easy-to-use, oral fluid collection system featuring technology to ensure the sample is adequate for testing. Donors can collect and cap their own samples on-site and in presence of a monitor, reducing the likelihood of adulteration or a donor challenge. The detection time for oral fluid testing is one to two days.

Hair Testing

Hair testing is the only drug testing method available that provides detection for up to 90 days of drug use history, making it an ideal solution for detecting long-term patterns of repetitive use.

For information about international drug testing, contact your Quest Diagnostics Sales or Account Management representative, or call our National Customer Support Center at 1.800.877.7484.

Point of Collection Testing (POCT)

Our POCT product provides instant test results and can be collected either on-site or at a collection site.

Collection Services

We have collection sites in most major cities and smaller, port cities. We also offer mobile, on-site collections in many locations.

A Company That Is There When You Need Us

Quest Diagnostics clients report that the structure and efficiencies of their drug testing programs are vastly improved because of the comprehensive suite of drug testing options and best-in-class customer service Quest Diagnostics provides. More than just drug detection, effective screening programs are built upon high quality processes that are repeatable, predictable, and scalable.
